Design services were provided for renovations to the Angioplasty Suite at the Hospital of St. Raphael in New Haven, CT, now part of Yale Health.

SILVER/PETRUCELLI+ASSOCIATES
Architects / Engineers / Interior Designers

Multi-disciplined Staff. Our in-house staff of 50 includes architects, mechanical/electrical engineers, interior designers, code consultants, spec writers and construction administrators.

Experienced. Our related design experience includes complex clinical and educational programs for the University of Connecticut Health Center in Farmington as well as the University's School of Dental Medicine. An expansion to the Community Health Center in Bridgeport as well as several projects at the former Hospital of St. Raphael (now Yale Health) are also highlights of our medical design experience.

Beyond the Hospital. As student health becomes a priority, we have recently incorporated full-service nurse's stations into our school design projects. In addition, unique environments, such as those at the new Whitney School in Hamden includes specialized programming that includes treatment rooms, occupational therapy rooms, sensory and aqua-therapy rooms, gross motor rooms, assistive technology training spaces, as well as vocational programs.

Focused on Patient Wellness. Our in-house interior design team is a key resource on healthcare projects bringing a passion for design, unique, sustainable spaces and acquired experience to focus each space on the successful care and recovery of the patient.

Green. Eight staff members hold LEED® credentials and many of our designs feature LEED-inspired elements.

High Watch Recovery Center, Kent, CT

We are proud to be a part of the expansion of High Watch, a residential medical facility that provides state of the art treatment for substance abuse and co-occurring psychiatric disorders. Design services include expansion of the facility and reconfiguration of existing spaces including a detox clinic, group room, and dining room. A \$10 million project.
